

Defender

Defender is a primer specially designed to protect GI surfaces and also works exceptionally well as all metal surfaces.

Defender forms a protective coating which protects the substrate from corrosion.

Defender is available in Black and Grey shades but can be customized in any RAL shade.

■ USPs

- Specially designed to protect extremely smooth GI surfaces.
- Does the job of primer and paint.(Interiors recommended)
- Long lasting protection from rust as epoxy forms a durable coating on the metal.
- Defender resolves problem of paint flaking typically seen in GI surfaces.
- Resistant to moisture and water.
