

## Du'o

Du'o is a water based epoxy for diverse applications, can be used as primer, waterproofing, curing compound as well as under coat for paint as it can be tinted with universal stainer. This confirms to USFDA limits for transmission and hence suitable for sensitive environments like food processing areas, pharma etc.

### ■ USPs ■

- Water based primer with minimal transmission even in warm water making it environmental friendly and can be used on wet surfaces (recommended).
- Continuous curing is not required if Du'o used immediately after first round of curing. Thus Du'o increase pace of work at construction sites and adds to significant cost saving on labour and water.
- Food Grade product as it confirms to USFDA transmission limits.
- Multiple colors can be made by using normal universal stainer.
- Increases paint coverage of final coat.
- Creates a waterproof coat as the surface.
